## **COMPANY PROFILE: -**

Classic Switchgears and Controls Pvt. Ltd. is one of the leading panel builders and contract manufacturers of electrical panels and allied products. We started as the exclusive contract manufacturer for Rockwell Automation in 2006, and entered the panel distribution space since 2009.

We are the one stop solution for providing complete electrical solution through proven products, innovative technology and unparalleled services. Whether it is Designing, Engineering and Supply or Supervision, Erection testing and commissioning, we have only grown from strength to strength with our dedicated team.

We have an extensive portfolio of an array of quality products and are registered with SMERA, NSIC and D&B. We are extremely keen to build a relationship with you and would like to have the honor to include your company amongst our fast-growing list of clients.

### **The following key factors contribute to Company strength:**

- Engineering expertise
- In house panel designing & manufacturing
- Dedicated team of experienced engineers for sales & after sales services
- Factory having 10000sq ft covered area in industrial area at Sahibabad and MG road

Our Control panels are designed and produced to provide stability, strength and elegance. Practical engineering and design of the equipment layout in the panels ensures ready accessibility and easy maintenance. Our products are: -

- Motor Control Center
- Power Control Center
- Control Desk for various applications
- AMF Panels
- Power factor improvement (capacitor) Panels
- AC/ DC Drive Panels
- Power & Lighting distribution boards
- D.G. Panels
- Junction Box
- Metering Box
- C & R Panels
- Bus Ducts
- Rising Mains etc.

## **Salient Features of CLASSIC MAKE PANELS**

- Semi Modular construction for future extensibility on both ends, Single/Double Front, Form 4 construction, Compartmentalization with standard dimension for reliability of quality and prompt delivery.
- Bus Bars made of electrolytic grade Aluminium/Copper with certified % IACS conductivity.
- Seven Tank Pretreatment of the panel which increases the life of powder coating.
- Best available powder is used and for durability of paint, it is baked at 200° C.
- Separate bus bars chambers isolated from cable alleys and unit feeder chamber for extra safety for maintenance staff.
- Design facilitating adequate space for cable or bus duct termination and providing required cable supports.
- Designed to meet climatic conditions.
- All live parts are properly shrouded by means of acrylic sheet in order to ensure safety against any accidental contact with live parts during maintenance.
- All Panels are fully tested before dispatch.

We have worked together with many well known consultants in the industry; few of them are as follows:

1. Mecon Ltd.
2. M.N.Dastur
3. Korus Engineering
4. Avant Garde
5. Senelac
6. Engineers India Ltd.

<b><u>SOME OF OUR ESTEEMED CLIENTS ARE :</u></b>
